

Seminar Series
Spring 2012 Schedule

Join us in the Rosenstiel Medical Science Building – 3109 **Mondays** or **Thursdays at Noon**

April		
2	Wael Bahnan	HRI, a "pro-pathogen" host kinase
	Amanda Tristan	
9	Dillon Betancourt	Retargeting VSV oncolytic vectors by introduction of viral glycoprotein domains
	Jen Bon Liu	
16	Justin Boucher	
	Mary McKuen	Functional Analysis and Host Response to the Type III Secreted <i>Chlamydia trachomatis</i> effector protein CT694
23	Ryan McCormack	
30	Xiaomei Yuan	
May		
4-8	AAI Meeting	
10	Brittany Ashlock	Characterization of a virally productive mouse model of Kaposi's sarcoma
14	Matthew Tsai	
21	Dr. Willem Hanekom	
28	Memorial Day	
June		
4	Kristian Richards	The Characterization of the Assembly and Function of the <i>Yersinia pestis</i> YscK _{KLQ} Complex
11	Priya Devarajan	Regulation of CD4+ memory T cells by CTLA4 in context of autoimmune diabetes
16-19	ASM Meeting	
21	Jason Miska	
25	Annalise Smith	Immunomodulatory Mechanisms of Withaferin A in Her-2/neu breast cancer
28	Holly Bullock	Multiple functional domains of <i>C. trachomatis</i> T3SS effector CT694

*On dates with two seminars, they will be presented in the order listed.
